

Origami Photo Cube(ish) Supply List

(Original design by Sok Song - Photo Modular)

Ten 4" x 6" photos

Six 4" x 6" pieces of cardstock (scrapbook cardstock is fine but for practice it is better if it is white in one of the sides)

1 extra piece of cardstock, 4" x 6" to make the stencil

Bone folder

Roll of Scotch tape

Pencil

Ruler

Scissors

Optional: Small self-healing mat (just using this as a shortcut measuring tool)

Please note: when choosing photos, the two horizontal 1" ends will not show up on the final design. So, unless you don't want the person in the far end to show, steer away from photos with the most important part at either pole. During the demo we'll make a stencil to help choose photos that are already printed. The final design uses only six photos — we have four extras as spares.
